

## Hospital Fire Sheffield Investigation into Cause

The following statement was issued to the "Star" from the Sheffield Royal Hospital to-day:

"The Board have appointed a committee for making full investigation into the cause of the fire, and they will report to the Board in due course. Mr. Booth, who received severe burns to his face and hands in a very plucky attempt to extinguish the fire, is making satisfactory progress, as is Inspector Cornish and an electrician, who was slightly injured.

"The Board are satisfied that the behaviour of the staff was most exemplary, and prevented panic. The whole thing was, over in a few minutes, and the prompt assistance of the Fire Brigade prevented what might have been a serious happening.
